

DAY 6 TASKS

Nainisha Bandari

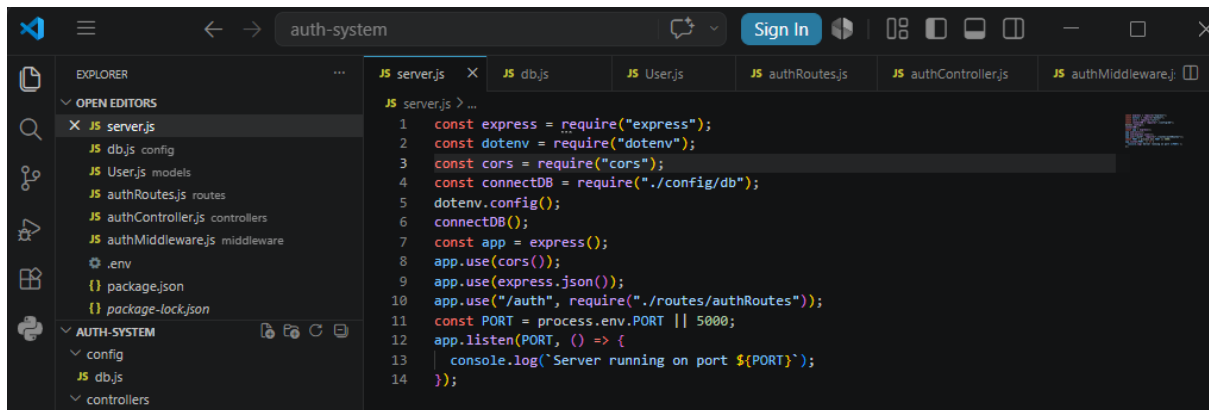

Nainishabandari1111@gmail.com

TASK 1-USER AUTHENTICATION SYSTEM

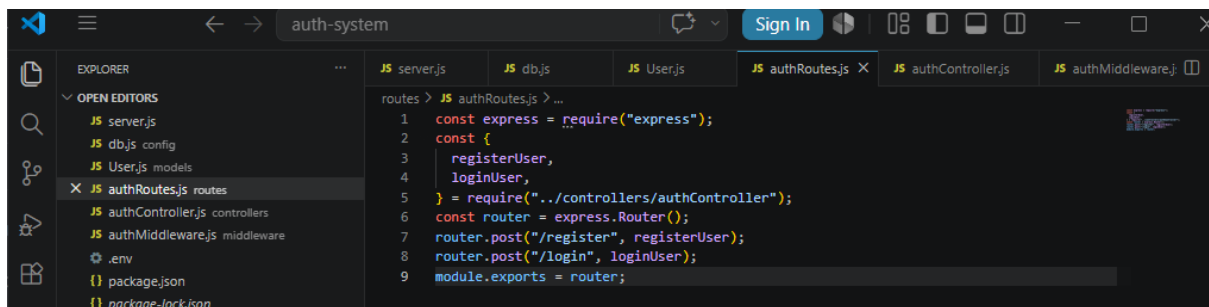

This screenshot shows the VS Code interface with the `.env` file open. The Explorer sidebar on the left shows the project structure with folders for `config`, `controllers`, `middleware`, `models`, `routes`, and `server`. The `.env` file contains the following configuration:

```
.env
1 PORT=5000
2 MONGO_URI=mongodb://127.0.0.1:27017/authDB
3 JWT_SECRET=mysecretkey
```

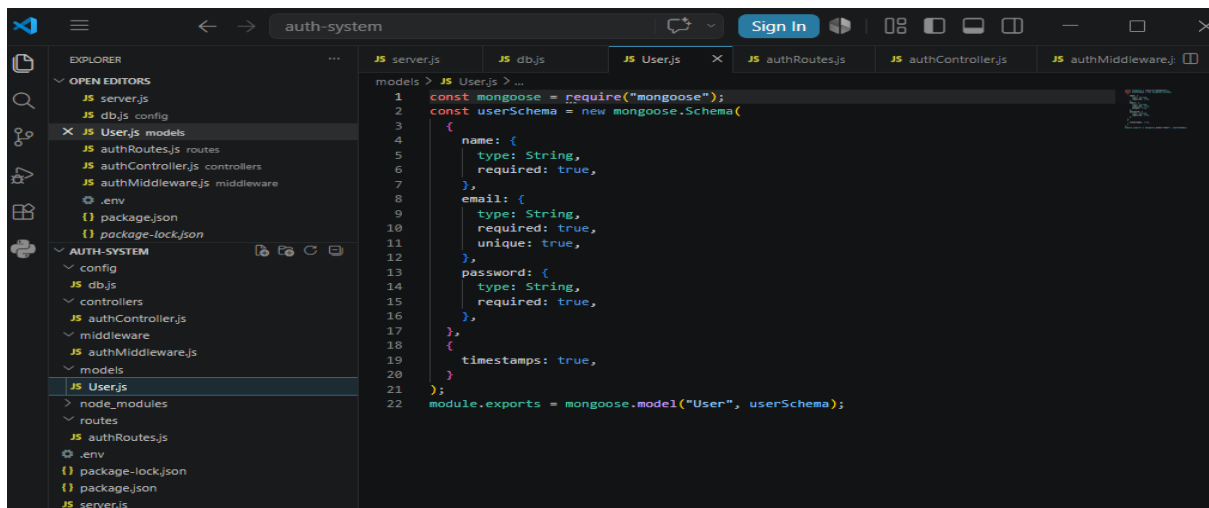

This screenshot shows the `server.js` file open in the editor. The Explorer sidebar shows the project structure. The `server.js` file contains the following code:

```
server.js
1 const express = require("express");
2 const dotenv = require("dotenv");
3 const cors = require("cors");
4 const connectDB = require("./config/db");
5 dotenv.config();
6 connectDB();
7 const app = express();
8 app.use(cors());
9 app.use(express.json());
10 app.use("/auth", require("./routes/authRoutes"));
11 const PORT = process.env.PORT || 5000;
12 app.listen(PORT, () => {
13   console.log(`Server running on port ${PORT}`);
14 });
```

This screenshot shows the `authRoutes.js` file open in the editor. The Explorer sidebar shows the project structure. The `authRoutes.js` file contains the following code:

```
authRoutes.js
1 const express = require("express");
2 const {
3   registerUser,
4   loginUser,
5 } = require("../controllers/authController");
6 const router = express.Router();
7 router.post("/register", registerUser);
8 router.post("/login", loginUser);
9 module.exports = router;
```

This screenshot shows the `User.js` file open in the editor. The Explorer sidebar shows the project structure. The `User.js` file contains the following code:

```
User.js
1 const mongoose = require("mongoose");
2 const userSchema = new mongoose.Schema(
3   {
4     name: {
5       type: String,
6       required: true,
7     },
8     email: {
9       type: String,
10      required: true,
11      unique: true,
12    },
13     password: {
14       type: String,
15       required: true,
16     },
17   },
18   { timestamps: true }
19 );
20 module.exports = mongoose.model("User", userSchema);
```

8   }
9 }
```

TASK2-PROTECTED ROUTE IMPLEMENTATION

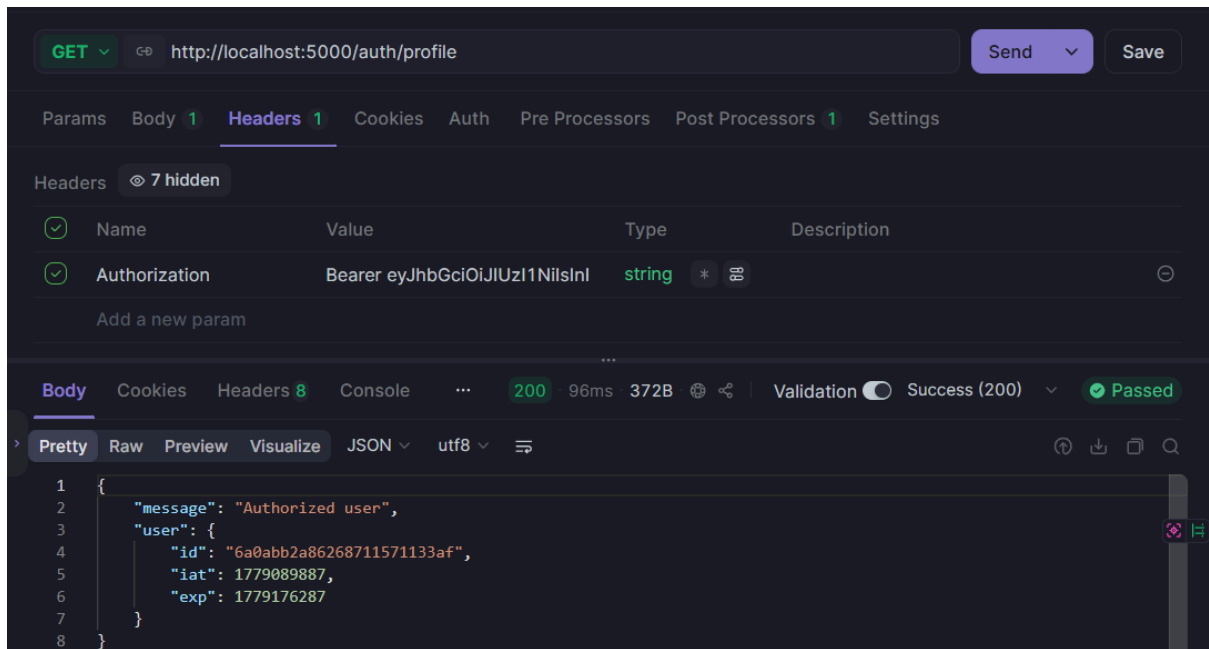

```
server.js  db.js  User.js  authRoutes.js  authController.js  authMiddleware.js  .env  package.json

middleware > JS authMiddleware.js > ...
1  const jwt = require("jsonwebtoken");
2  const authMiddleware = async (req, res, next) => {
3    try {
4      const token = req
5        .header("Authorization")
6        .replace("Bearer ", "");
7      if (!token) {
8        return res.status(401).json({
9          message: "Access denied. No token provided",
10         });
11      }
12      const decoded = jwt.verify(token, process.env.JWT_SECRET);
13      req.user = decoded;
14      next();
15     } catch (error) {
16       res.status(401).json({
17         message: "Invalid token",
18       });
19     }
20   };
21   module.exports = authMiddleware;
```

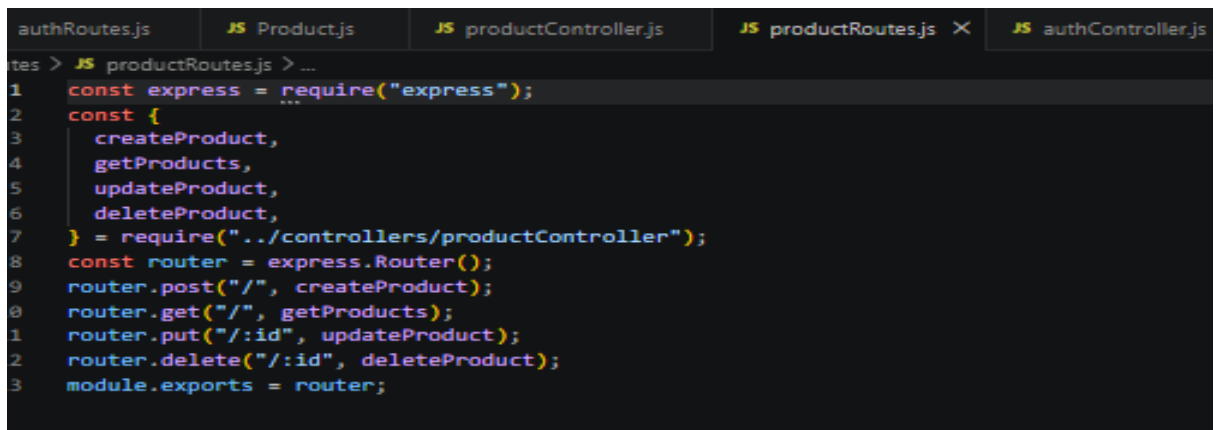

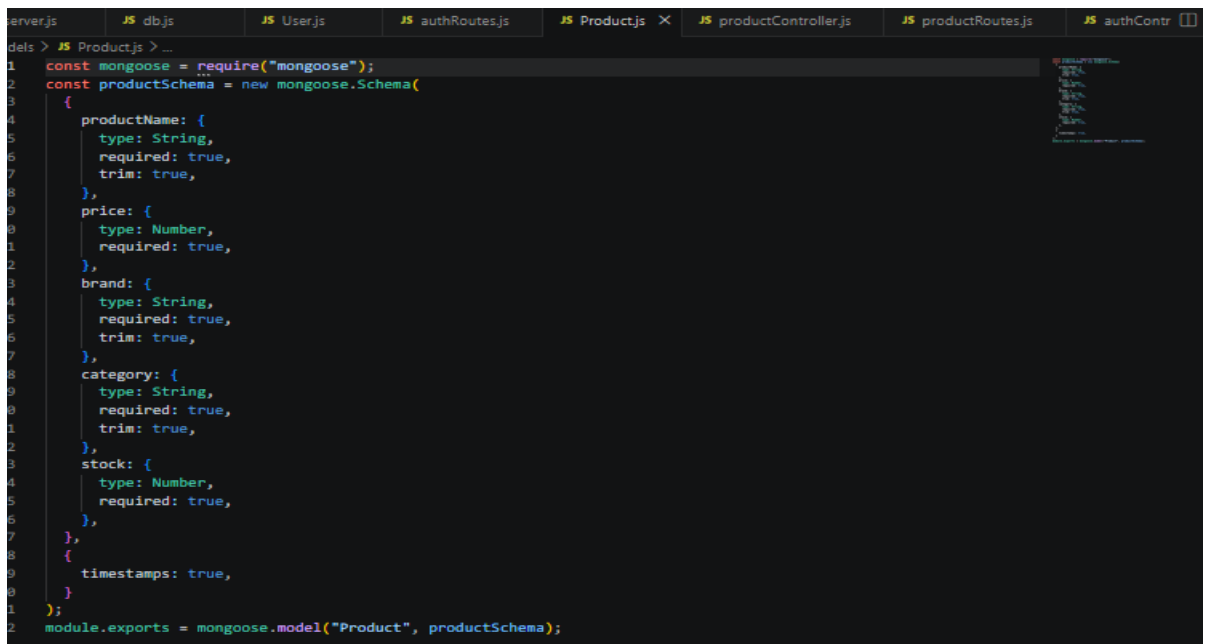

```
server.js  db.js  User.js  authRoutes.js  authController.js  authMiddleware.js  .env  package.json

routes > JS authRoutes.js > ...
1  const express = require("express");
2  const {
3    registerUser,
4    loginUser,
5  } = require("../controllers/authController");
6  const authMiddleware = require("../middleware/authMiddleware");
7  const router = express.Router();
8  router.post("/register", registerUser);
9  router.post("/login", loginUser);
10 router.get("/profile", authMiddleware, (req, res) => {
11   res.status(200).json({
12     message: "Authorized user",
13     user: req.user,
14   });
15 });
16 module.exports = router;
```

The screenshot shows the Postman interface with a POST request to `http://localhost:5000/auth/login`. The request body is a JSON object: `{ "email": "NainishaBandari@gmail.com", "password": "123456" }`. The response is a 200 OK status with a response time of 258ms and a size of 584B. The response body is a JSON object: `{ "message": "Login successful", "token": "eyJhbGciOiJIUzI1NiIsInR5cCI6IkpXVCJ9.eyJpZCI6IjZhMGFiYjJhODYyNjg3MTE1NzExMzNhZiIsIm1hdCI6MTc3OTA5MDYzNSwiZXhwIjoxNzcxMjc3MDc1fQ.p-bGHrtkd2sgqz4YyNmjR0Ev8jPovyA55oHB1c4", "user": { "id": "6a0abb2a86268711571133af", "name": "Nainisha Bandari", "email": "NainishaBandari@gmail.com" } }`. The test passed.

TASK3- CRUD API ENHANCEMENT
