

Database Schema Internship Daily Task-3

TASK 1: STUDENT MANAGEMENT SYSTEM DATABASE:

TASK2: SQL TABLE CREATION

OUTPUT:

Data Types

Column Name	Data Type	Description
student_id	INT	Unique identifier for each student
name	VARCHAR(100)	Name of the student
age	INT	Age of the student
gender	VARCHAR(10)	Gender details
email	VARCHAR(100)	Student email address
phone	VARCHAR(15)	Contact number

Column Name	Data Type	Description
course_id	INT	Unique identifier for each course
course_name	VARCHAR(100)	Course title
duration	VARCHAR(50)	Course duration
fees	DECIMAL(10,2)	Course fee amount

Column Name	Data Type	Description
enrollment_id	INT	Unique ID for enrollment
student_id	INT	Reference to student

course_id	INT	Reference to course
enrollment_date	DATE	Enrollment date

Primary Keys

Table	Primary Key
Students	student_id
Courses	course_id
Enrollments	enrollment_id

Foreign Keys

Table	Foreign Key	References
Enrollments	student_id	Students(student_id)
Enrollments	course_id	Courses(course_id)

TASK 3 :DATABASE RELATIONSHIPS

Relationship	Relationship Type
Teacher → Students	One-to-Many (1:M)
User → Passport	One-to-One (1:1)
Students → Courses	Many-to-Many (M:N)
Customer → Orders	One-to-Many (1:M)

One-to-Many:

One record can be linked to many records.

Example: One teacher teaches many students.

One-to-One:

One record is linked to only one record.

Example: One user has one passport.

Many-to-Many:

Many records can relate to many records.

Example: Students can enroll in many courses, and courses can have many students

TASK4: REAL WORLD DATABASE SCHEMA

Output:

The screenshot displays the SQL Server Enterprise Manager interface. On the left, the Object Explorer shows the server 'DESKTOP-NEQJMRS (SQL Server 15.0)' with a tree view including Databases, System Databases, Database Snapshots, CollegeDB, StudentManagement, Database Diagrams, Tables, System Tables, FileTables, External Tables, and Graph Tables. The 'Tables' folder is expanded. The main window shows a SQL query in a file named 'SQLQuery1.sql'.

```
SELECT TABLE_NAME
FROM INFORMATION_SCHEMA.TABLES
WHERE TABLE_TYPE = 'BASE TABLE';
```

Below the query editor, the 'Results' tab is active, displaying a table with 7 rows. The first row is highlighted.

	TABLE_NAME
1	Students
2	Courses
3	Enrollments
4	Customers
5	Restaurants
6	Orders
7	Delivery
